

**ABSTRACT OF THE DISCLOSURE**

The present invention provides a packaging and dispenser device comprising:

- a receptacle containing a first substance;
- an application surface secured to the receptacle during application of the first substance; and
- a closure capsule configured to be removably fixed on the receptacle, said closure capsule comprising:
  - fixing means for enabling the closure capsule to be fixed on the receptacle; and
  - at least one housing containing a second substance, said housing being suitable for opening from an end of the capsule remote from the fixing means in order to make it possible to take the second substance present in the housing.
